

## “One Small Town” Humanitarian Project

Name: **FULL NAME**

Phone: **PHONE**

Email: **EMAIL**

Date: January 3, 2022

## **SUBJECT: Humanitarian projects document Presentation.**

My humanitarian project will be a combination of some great ideas I have heard from others. I want to work this project like the “ONE SMALL TOWN” - Plan of Action by Michael Tellinger” and incorporate the quantum educational system which only requires the children to do 3 days of study and the other days they learn art n crafts painting gardening music traditional medicine meditation or other activities that may be of interest, science engineering, robotics, Etc. along with a co-op of producing hemp as a way to help with sustainable income in the long term for the towns growth.

In looking at revitalizing a small local town, with the boost of the RV Funds that we are going to receive I feel we can begin the search for the small town right away. This will most certainly be multigenerational project that will bring humanitarian aid to so many.

As we meet with the first town, we will keep track of progress, have meeting, create a standard operating procedure, and mark our progress, I will make this available for others so that the system can be repeated in many other small towns revitalizing them as we move out into a country, and state and the USA. I will be able to repeat this process and affect not only one community but many as we go from one town to the next setting up legitimate means for people to succeed.

### **HOW WILL I ACHIEVE THIS!**

My plan is to take the Funds received and create a team of people who will: Utilize the “**ONE SMALL TOWN**” process: we can do the following:

Find The town that needs the help to grow, has the determination to succeed and the land and weather required for the hemp plant crop.

- We will work with the community to understand their capabilities.
- Address the community’s weakness,
- We will purchase the land that will help provide the Hemp crops for growing using and selling.
- We will define the task needed to get buildings put up, share the work and the benefits.

The market for hemp-related products has grown exponentially. This market is expected to grow for the next few years now that the 2018 Farming Bill legalized hemp production by licensed growers.

Recent market research done by Brightfield Group revealed that the [CBD market is likely to hit \\$22 billion by 2020](#). With these staggering projected sales numbers, hemp growers are looking to get in on these potential profits that the industry has to offer. This raises a critical question, "Is hemp a perfect permaculture crop?"

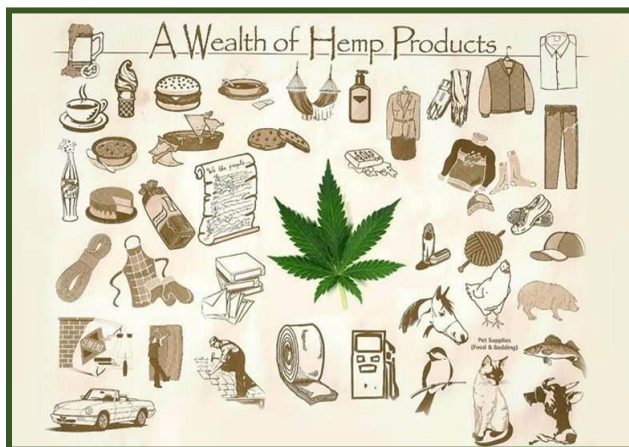

First let's define **PERMACULTURE!**

### **PERMACULTURE DEFINED:**

Over the past five years, permaculture has gained a significant following among people and organizations looking to maximize their lands' output while sustaining the land's natural value. It has found fans in cities, with numerous urban farms utilizing permaculture's cost-effective techniques to grow hemp and other crops in small spaces.

Successful permaculture farming relies heavily on using the appropriate methods for a particular region. Also, it is possible to maximize its effectiveness by choosing crops that grow with minimal or no intervention. Industrial hemp is an example of such plants. It is easy to grow and relatively eco-friendly compared to other crop species.

Permaculture is perceived as a sustainable approach to farming that offers a permanent solution to various problems that planet earth faces. Its core objectives include. Minimizing the carbon footprint of farming.

- Improving soil quality.
- Improve biodiversity.
- Optimize water usage and holding capacity.
- Increase farmers' income and improve their quality of life.
- Boost the yield of crops.

- Reduce the need for imported products.
- Improve local resilience and economy.

### **WHY HEMP:**

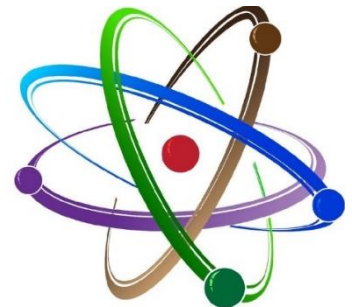

Marijuana contains high levels of THC, the intoxicating cannabinoid. However, industrial hemp contains less than 0.3 percent of THC. It cannot get the user high in the same way as marijuana. This is one of the primary reasons the United States legalized the growth of hemp among licensed individuals and organizations. Various studies show that hemp farming is an eco-friendly practice. It is linked to the following environmental impacts.

### **HERE ARE THE BENEFITS OF HEMP AS A PERMACULTURE CROP.**

- Fast growth
- Minimizes soil erosion
- Enhances local biodiversity
- Minimizes carbon footprint of farming
- High nutrient requirements
- Hemp's Commercial Uses

As the town grows and prospers based off the system as described above, we also hope to offer for the towns educational system, Quantum Learning.

QUANTUM LEARNING is a powerful and engaging teaching and learning methodology that integrates best educational practices into a unified whole. ... It has been proven to increase academic achievement and improve students' attitudes toward the learning process. Helping generations of Children who have not had similar opportunities to learn will greatly enhance the future for thousands of individuals.

### **BRING PASSION AND FUN BACK INTO TEACHING!**

Quantum Learning is a powerful and engaging teaching and learning methodology that integrates best educational practices into a unified whole. This synergistic approach to the learning process covers both theory and practice. It has been proven to increase academic achievement and improve students' attitudes toward the learning process. These integrated, comprehensive programs turn abstract theory into practical applications that can be used immediately in the classroom.

In Quantum Learning classrooms, workshops, schools in the US and worldwide, teachers, administrators and students gain the skills and motivation to contribute to creating an academically and socially successful school community.

## **QUANTUM LEARNING FOR TEACHERS (QLT)**

QLT is a professional development program of the Quantum Learning Network of Oceanside, California, USA. The program empowers educators from K-12th grade to create joyous, engaging and successful learning environments. Hong Kong programs are designed around the needs of each school. Public programs are held in the United States.

A few Quantum Learning Statistics...

- Over 40,000 teachers trained in and four million students impacted by Quantum Learning.
- Positive impact on student academic achievement in 30,000 classrooms, across all grade levels in over 30 states in the USA for 25+ years
- Statistically and educationally significant gains in reading, mathematics, and writing
- After Quantum Learning, students' test-taking skills increased 35%
- 100% of teachers reported an increase in their effectiveness.

Educators receive theory and strategies that can be implemented immediately for:

- Building a strong foundation of common understanding of classroom norms and procedures
- Creating a positive atmosphere of rapport and respect
- Constructing a supportive environment that reinforces learning.
- Facilitating effective classroom management based on motivation.
- Designing engaging lessons that make content more meaningful and support curriculum.
- Identifying and readying all types of learners
- Delivering effective presentations and eliciting more participation.

When teachers use a large repertoire of effective teaching strategies, students are more engaged and excited about learning and teachers are more passionate about teaching.

Once the first town is transformed our intentions are to begin again and work with another the system will be in place and will be easier to show the benefits and direction utilizing yet again the

## **THE IMPORTANCE OF MULTI-GENERATIONAL**

resources of the talent of the people in a local their talents and natural resources to the area. Crops and or skills will be put to use and defined based on each area needs.

**THIS WILL BE A MULTI-GENERATIONAL PROJECT** With employing a great deal of local help, providing a needed service, and responsible service to children, adults and the elderly. The USA is a land of great culture and variety and families' businesses and needs to have great assistance in providing a prosperous life for all these wonderful people. We need to be proud of our culture and prevent its future within the children from being used as slave labor and bring hope back to them.
