

SEEDS OF WISDOM TEAM PROJECTS INFRASTRUCTURE PROJECT

PROJECT OVERVIEW

Prepared for: Seeds of Wisdom Team Projects

March 4, 2022

SEEDS OF WISDOM TEAM PROJECTS

EXECUTIVE SUMMARY

Objective

To Provide Sustainable-Driven Solutions to Global Infrastructure Challenges. Largest multilateral source of debt and equity financing for the private sector in developing countries

Goals

Offer long-term financing and industry-leading expertise to develop infrastructure projects that provide essential services including electricity, telecommunications, transportation, water and sanitation.

Solution

- Seeks to improve access to energy, transportation, telecommunication, and municipal and environmental infrastructure.
- Support sustainable infrastructure through investments and advisory engagements that create jobs, build markets, and strengthen economies.
- Focus on early project development, advise governments and support sector reforms that can translate into private investment for priority projects and sectors.
- Help streamline the origination process and support clients in all needed services to secure sustainable outcomes.

Cost

- We will have an experienced team with a track record providing financing and solutions for high-impact projects in developing countries, including low income and fragile states.
- We will offer a range of financing and risk products tailored to meet project needs, including loans, equity, quasi-equity, currency swaps, and local currency products, alongside World Bank and MIGA guarantees and insurance.

- We mobilize funding through syndicate programs and work with our Asset Management Companies to engage with institutional investors.
- Our team will include specialists in sustainable infrastructure, linked financing, public-private partnerships (PPPs), transaction structuring, risk management, engineering, procurement, stakeholder engagement, communications, and environmental, social, and governance standards.

Special considerations

Due to the number of unknown factors, a realistic estimate can be established by the team after the project idea is submitted.

Closing Statement

I am passionately committed to this effort and am grateful for the team assistance for the success of this project.

In gratitude,
Seeds of Wisdom Team Projects
