

Why has NESARA not happened yet?

The coup began the dissolution of the Soviet Union and the beginning of the reign of Boris Yeltsin and his 'family' of Russian Mafia Oligarchs, and President of Kazakhstan.

In the final phase, a series of operatives assigned by President George H.W. **Bush** would begin the takeover of prized Russian and CIS industrial assets in oil, metals and defense. This was done by financing and managing the money-laundering for the Russian oligarchs through the Bank of New York, AEB and Riggs Bank.

A closer look at other activities leading up to these phases makes it clear that it was a U.S. orchestrated intelligence effort from the beginning.

The economic war involved Gerald Corrigan of the NY Federal Reserve Bank, George Soros, an international currency speculator who was responsible for crashing the British pound a few years earlier, former Ambassador to Germany R. Mark Palmer, and Ronald Lauder-financier and heir to the Estee Lauder estate. Palmer and Lauder would lead a group of American investors in an Operation called the Central European Development Corporation, and combine forces with George Soros and the NM Rothschild Continuation Trust. This group ended up controlling Gazprom, the Russian natural gas giant, while the Riggs group ended up controlling Yukos, the oil giant. Ownership for both remains largely 'hidden' today, while its front men endure the hardships of the Russian wrath by spending time in prison. Azeri-Armenian War in 1993

Bush Sr. had assigned a wide array of former Iran-Contra criminals to take a role in Azerbaijan. Initially, he sent in the covert operatives Richard Armitage and Richard Secord who worked with their old colleague from the Mossad, David Kimche, and their old arms running colleagues Adnan Kashoggi and Farhad Azima to hire, transport, and train more than 1,000 Afghan mujahideen mercenaries (aka Al Qaeda) to fight on behalf of the Azeri freedom fighters.

Osama Bin Laden was reported to have been part of this mercenary force.

Captured documents taken from battlefields in southwestern Azerbaijan provide the first hard evidence that Afghan troops hired by the Azerbaijan government were actively involved in recent fighting with Armenian forces. Armenian officials now warn that the introduction of Muslim Afghan fighters poses the danger of turning the conflict, between Christian Armenians and Muslim Turkic Azeris, into a religious war. It further intensifies the danger of broadening of the conflict to involve neighboring Iran and Turkey, provoking

a reaction from Russia, which also borders this region. Azerbaijan and Armenia are both former Soviet republics.

Ten years later in 2001, these programs had finally come back to haunt the US policy makers. Most, if not all of these programs appear to have stepped outside of the boundaries of the law. As a result, investigative agencies from Britain, Switzerland, Russia, Kazakhstan and the Philippines were putting pressure on Congress and the US Department of Justice to open up the accounts in the banks used to finance these covert activities.

Pressure was being put on the Swiss banking cartel to open its bullion records to public scrutiny. Full disclosure by these banks during an investigation would have resulted in a major exposure of US complicity in some of the greatest financial frauds of the 1980s and early 1990s as well as 50 years of gold bullion theft by numerous US and British government agencies. Moreover, investigation into these accounts would disclose a National Security secret known as the Black Eagle fund, and virtually every covert operation since World War II.

History suggests that in September of 1991, George H.W. Bush and Alan Greenspan did indeed finance \$240 billion in bonds in a buyout of the Soviet Union as part of a broader program to end the Cold War through an attack on the economy of the Soviet Union. and ten years later in 2001, these programs had finally come back to haunt the U.S. policy makers. Most, if not all of these programs appear to have stepped outside of the boundaries of the law.

As a result, investigative agencies from Britain, Switzerland, Russia, Kazakhstan and the Philippines were putting pressure on Congress and the U.S. Department of Justice to open up the accounts in the banks used to finance these covert activities, which were being viewed as criminal activities in foreign courts. Alan Greenspan, the Treasury Department and key banks in the U.S. and Europe were being sued for gold-price fixing or illegal gold sales which appears to have its origins in the covert war chest used to wage this war.

These investigative and legal pressures began to accumulate in 1997, and in February 1998 increasing the magnitude of exposure these bankers and government officials faced.

Carlyle Group is the biggest defense contractor on the planet. The majority owners of the Carlyle Group are the **Bush** family and the bin Laden family. They are profiting in the hundreds of billions off of this new war.

(Judicial Watch, September 28, 2001, "**Bush** Sr. in Business with Bin Laden Family Conglomerate Through Carlyle Group"; The Village Voice, October 11, 2001, "Bush Sr. Could Profit from War"; BBC News, December 4, 1997, "Taleban in Texas for talks on gas pipeline")

On December 4, 1997, a BBC headline read, "Representatives of the Taliban are in Texas Visiting the Headquarters of Unicol." The article went on to report that they were in Texas with the Halliburton-connected pipeline construction company. Dick Cheney was the CEO of Halliburton from 1995 to 2000, Unicol to negotiate their support for a pipeline, which would be built by Halliburton.

The **Bush** family have strong ties to the oil industry going back to John D. Rockefeller and the early days of the industry. George W. **Bush's** great-grandfather, Samuel Bush, was an associate of John D. Rockefeller and ran Buckeye Steel Castings in the early 20th century. The daughter of George Herbert Walker, the financier and associate of the Harrimans, married Samuel's son, Prescott Bush, investment banker, U.S. senator, and father of George Herbert Walker Bush (Bush senior).

In the decade 1991-2001, Americans paid \$1.6 trillion more in taxes that energy extraction corporations, and energy extraction corporations received \$0.8 trillion more in federal payments than it paid in federal taxes. The lion's share of subsidies and tax breaks to the energy industry goes oil, gas, and coal corporations.

The primary reason these noneconomic subsidies continue to flow decade after decade is the political power of the extraction industries, a power that has been wielded in both Republican and Democratic administrations but has been greatly magnified under the **Bush** administration. There 53 members of the **Bush** administration with close ties to the extraction industries.

According to leaked documents from an intelligence file obtained through a military source in the Office of Naval Intelligence (ONI), on or about September 12, 1991, non-performing and unauthorized gold-backed debt instruments were used to purchase ten-year bonds. The bonds in turn were illegally employed as collateral to borrow **\$240 billion**--120 in Japanese Yen and 120 in Deutsch Marks--exchanged for US currency under false pretenses; or counterfeit and unlawful conversion of collateral against which an unlimited amount of money could be created in derivatives and debt instruments.

The illegal transactions are also linked to the murder of a US Army Colonel Russell Hermann, who was charged with overseeing approximately 175 secret CIA bank accounts, according to the officer's wife, Mrs. V. K. Durham. During multiple interviews, Mrs. Durham said that **Bush 41** and **Clinton** administration officials visited her husband several times in the months prior to and three days before his torture and murder on

August 29, 1994. She stated that Col. Hermann believed these funds were the property of the US citizens rather than the private slush fund of the **Bush** circle, and protested the manner in which they were being used. Ambassador Leo Wanta has since maintained a similar stance, that the earnings from his covert operations should be public funds rather than covert slush funds used by criminal US presidents.

Durham said **\$240 billion in stolen currency was obtained resulting from George H. W. Bush's presidential abuse of power**, when he authorized former Treasury Secretary Nicholas Brady and former Secretary of State James Baker III to make fraudulent use of the Durham Family Trust collateral without her permission. There is evidence that Colonel Hermann's and V. K. Durham's signatures were forged on a Goldman-Sachs bank account certification requesting the conversions to U.S. currency.

The money was never repaid since the ten-year bonds--purchased before September 13, 1991, using the fraudulent collateral and gold bullion as security came due on September 12, 2001--the day after the 9.11 attacks, having allegedly been underwritten and held by the trustee, Cantor-Fitzgerald bond brokerage firm . Moreover, Durham alleges that any 10-year bond payoff for notes due on 9-12-2001 would have led to additional evidence of trillions in stolen funds from the US Treasury. Besides the intelligence file leaked to Durham, other documents were obtained by Tom Flocco from whistleblower Stewart Webb's intelligence sources.

The following is a summary of the book
Gold Warriors - The Vulcans - Murdering Liberty and Killing Hope on 911
By Jeff Prager

WHY September 11th - The Cover-up of the Black Eagle Trust and Project Hammer

With the bonds out in the market, they sat for ten years, like a ticking time bomb. At some point, they had to be settled - or cashed in, on September 11, 2001.

The two firms in the US most likely to be handling them would be Cantor Fitzgerald and Eurobrokers – the two largest government securities firms in the US. The federal agency mostly involved in investigating those transactions was the Office of Naval Intelligence. All three offices destroyed on Sept. 11th.

There were at least nine federal investigations being conducted into bank accounts related to operations. All of these investigations were initiated, in 1997-98 timeframe:

1) The Marcos Gold Hearing began in Los Angeles, in August 1997. The banks and accounts involved in that hearing, were the Swiss banks: UBS, and Bank Julius Baer.

2) The Eizenstat Report and a public campaign waged by the Simon Wiesenthal Center launched suits against three Swiss banks.

3) The Reginald Howe suit - in which the US bullion banks were accused of dumping US Treasury gold on the market illegally. The Reginald Howe & GATA Lawsuit was filed on January 8th, 2000 naming Deutschebank (a.k.a. Deutschebank Alex Brown), US Treasury, Alan Greenspan, Federal Reserve, Citibank and Chase, as defendants. Also mentioned as having non-public knowledge of the scheme are Gerald Corrigan and Barrick Gold. (The 2000 filing suggests investigations began long before.)

4) The Bank of New York money laundering scandal: the Department of Justice was under pressure to investigate accounts of multiple individuals who benefited from these transactions: Loutchansky, Marc Rich and Berezovsky (Berezovski). The FBI investigation started in the Fall of 1998. The investor lawsuit was opened in September 1999. These investigations involved accounts at Credit Suisse, Union Bank of Switzerland (UBS), Dresdner Bank, Westdeutsche Landesbank and Banque Internationale of Luxembourg. All of these individual would at some point be mentioned as playing a role in the money laundering scandal at the Bank of New York, that would ultimately be reopened in 2002, after being buried for three years by federal prosecutor Mary Jo White, a first cousin to former **President George Bush**.

5) The Avisma law suit was filed August 19th, 1999, naming as defendants Bank Menatep, Harvard Institute for International Development, and the Bank of New York;

6) The federal investigation of Konanykhine's European Union Bank: The Konanykhine investigation was begun by the INS in February 1999. Other banks included in that investigation would have been the European Union Bank and Bank Menatep.

7) Richard Giffen/Mobil Oil scandal - The FBI Probe began in 1999, and would have involved accounts at Credit Suisse, Bank of New York, Cayman Islands, and the Deutsche Bank (a.k.a. Deutschebank Alex Brown).,

8) Yeltsin's Union Bank of Switzerland accounts were being investigated for bribery.

9) Kevin Ingram would testify that he had advised Bob Graham in advance that the World Trade Center was to be attacked. This Deutsche Bank executive was convicted of laundering money for weapons purchases for Muslim terrorists through Pakistani agents; The Ingram investigation was begun by the FBI as early as July 1999, and involved the Deutschebank (a.k.a. Deutschebank Alex Brown). The records for some of these

investigations resided in World Trade Center, Building Six, Building Seven and the North Tower. The account structure set up by the US intelligence operations was besieged by investigations from nine different directions, any one of which may have exposed the source of that funding, and traced it to its Black Eagle Fund origins. Those investigations needed to be diverted.

On September 11th, the Federal Register reported that the physical securities held by the brokers in their vaults had been destroyed.

~~~~~  
~~~~~

The Federal Reserve Suspends the Rules

On the first day after the Sept. 11, 2001, alleged terrorist attack, the Security and Exchange Commission (**SEC**) lifted "Rule 15c3-3 - Customer Protection, Reserves and Custody of Securities," which set trading rules.

As a result the Federal Reserve and the Government Securities Clearing Corporation (GSCC) had created a settlement environment **totally void of controls and reporting** – where it could substitute valid, new government securities for the mature, illegal securities, and not have to record where the bad securities came from, or where the new securities went – all because the paper for the primary brokers for US securities had been eliminated.

The Government Securities Clearing Corporation (GSCC) part of the Division of Market Regulation of the SEC. **GSCC** is registered with the Securities and Exchange Commission as a securities clearing agency for U.S. government securities. **GSCC** provides automated trade comparison, netting, and settlement services for US **GSCC** employs a number of risk management procedures that enable it to guarantee settlement of all net settlement positions. Through its daily mark to the market process, **GSCC** brings net positions that are not due for settlement from contract value to current market value each day. Each morning, **GSCC** collects mark payments from Netting Members that are in a debit mark position and pays such marks to Netting members that are in a credit mark position. In addition to the risk management procedures described above, another of **GSCCs** risk management controls is its Clearing Fund. The Clearing Fund ensures that,

if one or more of its members fails, **GSCC** has sufficient liquidity at all times to meet its payment and delivery obligations.

The Federal Reserve did not have enough "takers" of the new 10-year notes. Rather than simply having to match buy and sell orders, which was the essence of resolving the "fail" problem, it appears the Fed was doing more than just matching and balancing – it was pushing new notes on the market with a special auction. It appears some of the beneficiaries wanted to cash out!

"Acute settlement problems with the on-the-run ten-year note led the U.S. Treasury to reopen the issue on October 4 and hold an unusual "snap" auction of new ten-year securities."

If the Federal Reserve had to cover-up the clearance of **\$240 Billion** in covert securities, they could not let the volume of capital shrink by that much in the time of a monetary crisis. They would have had to push excess liquidity into the market, and then phase it out for a soft landing, which is exactly what appears to have happened. In about two months, the money supply was back to where it was prior to 911.

In the aftermath of September 11th, the SEC appears to have allowed the Bank of New York and the Federal Reserve to engage in securities refinancing that resulted in the American taxpayer **refinancing the \$240 billion originally** used for the Great Ruble Scam. A review of the explanations for the actions of the Federal Reserve after September 11th exposes an amazingly complex web of analysis and speculation. The reports published by the Federal Reserve argue that the Federal Reserve's actions increasing the monetary supply by over \$300 billion were justified to overcome operational difficulties in the financial sector.

A Federal Reserve report about what happened in the aftermath of the 9/11 attack, indicated that only "a few" were seriously disrupted. An analysis of the FED report suggests that any disruptions were essentially concentrated in one bank – the Bank of New York (**BoNY**). The same Bank of New York was being investigated for money laundering charges in relation to the economic pillaging of Russia by criminal oligarchs.

"At one point during the week after September 11, **BoNY** publicly reported to be overdue on \$100 billion in payments."

The Deutschebank, which sat inside the World Trade Center and was totally decimated, reported no such account balance increase, and JP Morgan, the other of only two clearing banks which uses the same traders and communications hub, reported no such increase in its account balance. No one has publicly asked: why is it that these other two banks were not seriously disrupted, while the Bank of New York – which had no structural damage, seemed unable to operate? Understanding what was happening at the BoNY becomes critical to understanding the securities settlement issues:

GSCC and several dealers could not verify what came into and what left their custodial accounts at BoNY, they could not advise BoNY of securities they expected to receive, and they could not give BoNY instructions for delivering securities. Additionally, GSCC was unable to verify the movement of funds into and out of its account at BoNY (GSCC Important Notice GSCC068.01).

Finally, with respect to the Bank of New York operations and the level of disruption experienced on September 11th, an important element needs to be highlighted. Disruptions to the financial system were attributed to the loss of the communications hub in downtown Manhattan. The telephone network operations center (NOC) or hub was decimated when the WTC collapsed onto it. However, the BoNY Funding Transfer operations, which reportedly could not communicate with the Fed, were located in Utica, New York, and had none of its communication abilities impaired. Moreover, the four BoNY back-up datacenters were all located within 46 miles of Manhattan, and could and did deliver data on tape regularly to the Fed via courier.

- The disruptions to the U.S. financial system were not as widespread as the reports from the Federal Reserve would have the public believe, but that the public had to be made to perceive a widespread need for declaring a national financial emergency, suspending key provisions of the Federal Reserve Act and driving the 'ten-year special rate' to almost zero.
- Certain key unknown figures in the Federal Reserve may have 'conspired' with key unknown figures at the Bank of New York to create a situation where **\$240 billion** in off balance sheet securities created in 1991 as part of an official covert operation to overthrow the Soviet Union, could be cleared without publicly acknowledging their existence.
- These securities, originally managed by Cantor-Fitzgerald, were cleared and settled in the aftermath of September 11th through the BoNY. The \$100 billion account balance bubble reported by the Wall Street Journal as being experienced in the BoNY was the tip of a three-day operation, when these securities were moved from off-balance-sheet to the balance sheet.
- By reducing the 'ten-year special rate' to almost zero, the Fed structurally increased the number of refinancing (Repo) settlement fails. Under the umbrella of this artificially created statistical bump of fails, the high level of fails due to the laundering of the **\$240 billion** was able to be processed unnoticed.
- The cover for this bubble is found in the footnotes to the BoNY annual and quarterly reports, which report that the BoNY took over \$330 billion of commercial securities business from U.S. Trust between June and October of 2001, although the assets under control of U.S. Trust in 2000 were reported by two sources as \$80 or \$86 billion.

On over-riding consideration in the Fed's management of the aftermath of September 11th was the concentration in account balances at the Federal Reserve.

It is clear that the concentration in account balances at the Federal Reserve — **rising more than fourteen- fold from its normal levels on the days following the terrorist attacks**—was a most unusual event. If a large proportion of the balances in the banking system concentrate in one bank's account, then other banks will face, all else being equal, higher costs of making payments, or alternatively may face liquidity constraints on their borrowing, which could preclude their submission of further payments."

A key consideration is the pre-911 daily average for this balance. These balances and service-related balances for August 2001 averaged \$14.65 billion per day. This makes the actual surges due to the 9/11 attack show a net impact of \$352 billion on the account balance over the remainder of the week. What appears to be the case is that the Federal Reserve imbalances reported on three consecutive days in the aftermath were largely concentrated at the Bank of New York, which is reported to represent over 90% of the imbalance, suggesting the Bank had been the recipient of massive fund transfers, and unable to send out transfers.

None of the BoNY's systems failed or went non-operational. Todd Gibbons of the BoNY reported an "increase" in the volume of securities on September 11.

"The contingency site must be able not only to accommodate normal business loads, it must be able to accommodate extreme business surges, such as we saw in the first day in the equities market. Our contingency plans had included the ability to handle a great amount of excess capacity; and we were able to handle the increase in volumes..."

However, the overall volumes for the day were 25% less than normal and one third of the volume or \$400 billion came in after normal business hours **in very few transactions**. Overall transactions for Sept. 11th were seemingly down even more significantly than volume, but the transactions that **came in after closing were extremely large**, averaging in size in packages of \$35 million or more. This would be consistent with a hypothesis that **\$240 billion of securities** were being pushed surreptitiously into the money supply. Additionally, the conflicting information from the BoNY and Fed suggests the activity in the bank was different than that being reported to the public.

"August 2001, the value of Fedwire funds transfers averaged more than \$1.6 trillion per day, while banks held about \$15 billion on account. The value of funds sent on September 11th was \$1.2 trillion, about three-fourths of the average for the benchmark period. However, unlike volume, the value of funds sent had returned to normal levels on the twelfth and was then at elevated levels for the next seven business days."

(Liquidity Effects of the Events of September 11, 2001, James J. McAndrews and Simon M. Potter, Federal Reserve Bank of New York Economic Policy Review, November 2002, p65).

The Federal Reserve, without providing the detail required to substantiate its claims, would have the public believe that there were widespread liquidity issues, when in fact the issues were very concentrated primarily, if not singularly, in the BoNY, which has been the subject of an ongoing major money-laundering investigation for many years.

Summary:

What we have is evidence of some people knew how to game the financial system and on Sept. 11, 2001, nine federal investigations were stopped and there is every reason to believe activities in the Bank of New York in the aftermath of September 11th are worthy of suspicion.
