My plan was to take a boat ride with those interested and deliver a complete Financial Seminar that would cover everything I know about business plans, personal wealth accumulation and investing and the tax laws and how to use them to your advantage. I am retired since 2008 and no longer take personal participation in individual implementation of plans, but I will identify how to find those professional advisors necessary to create your plans

Will be 7 to 10 days to cruise from New Orleans to Memphis and returning minimum of 7 but we can arrange a few extra days if we think it necessary

Texas Snake, Read something earlier that the cruise would need to wait until the NDA ran its course, not sure I agree with that thought with the main item being one does not reveal their exact exchange rate, thereby allowing a gathering of sole currency exchangers to honor the NDA totally. Will inquire of the banker in the morning as one of the primary purposes of the cruise is to explore how best to allocate your funds based upon your personal needs goals and objectives

---

If everyone wishes to meet one another at a land meeting in New Orleans and then a Riverboat cruise to Memphis and back I am very flexible and a couple of members were booking agents in their past and have offered to help set this all up.

---

Mississippi River boat from New Orleans to Memphis and return where I will do financial planning seminars a couple of hours each day, but it hasn't been scheduled as yet and may be changed depending on interest and attendance numbers

---

Texas Snake

They will be recorded on DVD's and available for shipping afterwards
